2 A helium balloon is taped to a top-pan balance. A metal block of mass 100 g is placed on the balance. The reading on the balance is 91 g.

Which statement can be deduced from this experiment?

A The balloon exerts a downward force of 0.09 N on the top-pan balance.

B The helium has a mass of –9 g.

C The helium has a mass of +9 g.

D The resultant downward force on the top-pan balance is 0.89 N.
