2 A train is on a straight track. The graph shows how a quantity *y* varies with time.

Which statements can be true?

1 The train is stationary and *y* represents the distance from the last station.

2 The train is moving and *y* represents the distance from the last station.

3 The train is stationary and *y* represents the speed of the train.

4 The train is moving and *y* represents the speed of the train.

A 1 and 2 **B** 1 and 4 **C** 2 and 3 **D** 3 and 4
