6 A weightless beam is balanced on a pivot as shown. Forces P, Q and R act on the beam.

Which equation is correct?

A $(P \times c) + (Q \times b) = (R \times a)$

B $(P \times c) - (Q \times b) = (R \times a)$

C $(P \times d) + (Q \times b) = (R \times a)$

D $(P \times d) - (Q \times b) = (R \times a)$
