40 A galaxy at a distance of 3.1×10^{21} km is moving away from the Earth with a speed of 7000 km / s.

What is the Hubble constant H_0 calculated using this data and what is the speed of a galaxy at a distance of 6.2×10^{21} km from the Earth?

	H_0 / s^{-1}	$\frac{\text{speed of galaxy}}{\text{km/s}}$
A	2.3×10^{-18}	3 500
B	2.3×10^{-18}	14 000
C	4.4×10^{17}	3 500
D	4.4×10^{17}	14 000
