11 Some altimeters use the change in air pressure to measure height.

If the pressure is 100 kPa at sea level on a particular day, what will the pressure be at the top of an 830 m hill?

(Take the density of air to be constant at 1.3 kg/m^3.)

A 1.1 kPa **B** 11 kPa **C** 89 kPa **D** 110 kPa
