29 An electrical appliance has a symbol on it to indicate it is double-insulated.

Which statement is correct?

A A two-core, flexible cable with **no** earth wire is used to connect it to the mains supply.

B It needs an earth wire that is connected to a fuse.

C **No** fuse or circuit breaker is needed.

D The cable should be connected to the live and earth connectors of the plug but **not** the neutral.
