38 A space probe measures the gravitational field strength at four different distances from a planet.

The point furthest from the planet is measured first and the point nearest the planet is measured last.

In which order were the measurements taken?

A 6.3 N / kg, 10 N / kg, 14 N / kg, 20 N / kg

B 10 N / kg, 14 N / kg, 6.3 N / kg, 20 N / kg

C 20 N / kg, 14 N / kg, 6.3 N / kg, 10 N / kg

D 20 N / kg, 14 N / kg, 10 N / kg, 6.3 N / kg
