33 The table shows the properties of two different wires, P and Q.

	length	resistance	resistivity of material
wire P	l	R	ρ
wire Q	$2l$	$\frac{1}{4}R$	$\frac{1}{3}\rho$

Wire P has a cross-section of diameter d.

What is the diameter of the cross-section of wire Q?

A $0.41d$ **B** $1.6d$ **C** $2.7d$ **D** $7.1d$
