24 A transverse wave and a longitudinal wave both travel in the same direction down a long stretched spring.

Which statement is **not** correct for these two forms of wave?

A The displacement measurements for the particles of the two waves are made at right angles to each other.

B The energy transferred by the two waves is in the same direction.

C The velocities of the two waves are in the same direction.

D The wavelength measurements for the two waves are made at right angles to each other.
