3 Two measurements for a solid sphere are shown.

$$\text{mass} = (32.5 \pm 0.1)\,\text{g}$$

$$\text{diameter} = (1.87 \pm 0.04)\,\text{cm}$$

These values are used to determine the density of the sphere.

What is the percentage uncertainty in the density?

A 2.4% **B** 4.6% **C** 6.1% **D** 6.7%
