30 A metal wire is connected between the terminals of a cell so that there is a current in the wire.

Which statement is correct?

A Negatively charged electrons in the wire move from the negative terminal to the positive terminal.

B Negatively charged nuclei in the wire move from the negative terminal to the positive terminal.

C Positively charged electrons in the wire move from the positive terminal to the negative terminal.

D Positively charged nuclei in the wire move from the positive terminal to the negative terminal.
