13 A ball of mass 0.10 kg is thrown towards a stationary vertical bat. The ball hits the bat with a horizontal velocity of 20 m s^{-1}.

The ball rebounds and leaves the bat with a horizontal velocity of 15 m s^{-1}.

What is the change in momentum of the ball?

A 0.20 N s **B** 0.50 N s **C** 1.5 N s **D** 3.5 N s
