**15** A uniform beam PQ rests horizontally on a support at point S.

A rope is attached at one end of the beam. The rope is at an angle of 60° to the vertical and exerts a force *F*, in newtons, on the beam.

What is the moment, in N m, of the force *F* about the point S?

**A** 1.1*F** **B** 1.3*F** **C** 1.9*F** **D** 2.2*F**
