**28** Interference fringes of separation $x$ are observed on a screen at a distance of 1.00 m from a double slit that is illuminated by yellow light of wavelength 600 nm.

At which distance from the double slit would interference fringes of the same separation $x$ be observed when using blue light of wavelength 400 nm?

**A** 0.33 m **B** 0.67 m **C** 0.75 m **D** 1.50 m
