

**36** Kirchhoff's first and second laws are a consequence of the conservation of different quantities.

What are those quantities?

|          | <b>Kirchhoff's<br/>first law</b> | <b>Kirchhoff's<br/>second law</b> |
|----------|----------------------------------|-----------------------------------|
| <b>A</b> | charge                           | energy                            |
| <b>B</b> | energy                           | current                           |
| <b>C</b> | current                          | charge                            |
| <b>D</b> | energy                           | charge                            |
