

**39** A nucleus undergoes  $\beta^+$  decay.

A neutrino and two other particles are produced in this decay.

Which other two particles are produced?

|          | positron | electron | proton | neutron |
|----------|----------|----------|--------|---------|
| <b>A</b> | ✓        | ✗        | ✗      | ✓       |
| <b>B</b> | ✗        | ✓        | ✓      | ✗       |
| <b>C</b> | ✗        | ✓        | ✗      | ✓       |
| <b>D</b> | ✓        | ✗        | ✓      | ✗       |

**key**

✓ = produced

✗ = not produced
