**6** **(a)** State what is meant by a magnetic field.

.....

.....

..... [2]

**(b)** A long, straight wire P carries a current into the page, as shown in Fig. 6.1.

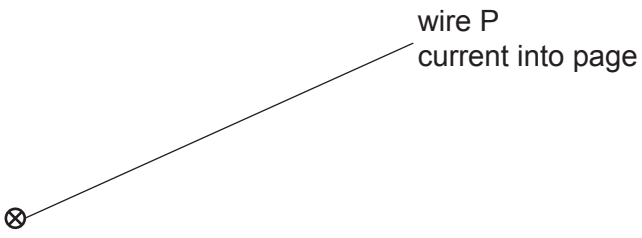

**Fig. 6.1**

On Fig. 6.1, draw four field lines to represent the magnetic field around wire P due to the current in the wire. [3]

**(c)** A second long, straight wire Q, carrying a current of 5.0 A out of the page, is placed parallel to wire P, as shown in Fig. 6.2.

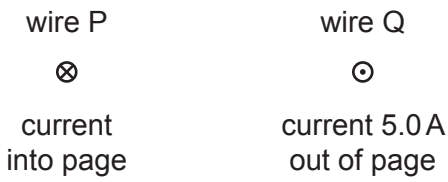

**Fig. 6.2**

The flux density of the magnetic field at wire Q due to the current in wire P is 2.6 mT.

**(i)** Calculate the magnetic force per unit length exerted on wire Q by wire P.

force per unit length = ..... $N\,m^{-1}$ [2]

© UCLES 2023

**(ii)** State the direction of the force exerted on wire Q by wire P.

..... [1]

**(iii)** The flux density of the magnetic field at wire P due to the current in wire Q is 1.5 mT.

Determine the magnitude of the current in wire P. Explain your reasoning.

current = ..... A [2]
