

- 6** What is a statement of the principle of conservation of momentum for a system?
- A** The total momentum and the total kinetic energy are always conserved.
 - B** The total momentum is conserved only in elastic collisions.
 - C** The total momentum is conserved provided that no external forces act.
 - D** The total momentum of each object in the system is the product of its mass and velocity.

7 Objects P and Q form an isolated system.
