24 In still air, the air pressure is p and the average distance between the air particles is d.

A sound wave produces rarefactions as it travels through the air.

In a rarefaction, the air pressure is P and the average distance between the air particles is D.

Which statement is correct?

A $P > p$ and $D > d$

B $P > p$ and $D < d$

C $P < p$ and $D > d$

D $P < p$ and $D < d$
