**10** **(a)** Nuclear fission is the process used to transfer energy in a nuclear reactor in a power station.

**(i)** Describe the process which occurs when heavy nuclei undergo fission in a power station.

.....

.....

.....

.....

..... [3]

**(ii)** Complete the sentences to describe how energy is used to generate electricity in a nuclear power station.

Thermal energy is used to heat ..... to produce

..... at high pressure. This drives a .....

connected to a generator.

[2]

**(iii)** State **one** advantage and **one** disadvantage of the use of nuclear energy to generate electricity compared with the use of light from the Sun (solar cells).

advantage .....

.....

disadvantage .....

.....

[2]

**(b)** Radiation from the Sun is **not** the source of energy for nuclear energy.

State **one** other energy resource which does **not** have the Sun as its main source of energy.

..... [1]
