12 At time = 0, a cannonball is stationary inside a cannon. The cannonball is then fired from the cannon.

At time = *t*, the cannonball moves forwards and the cannon moves backwards.

What happens to the total kinetic energy and the total momentum of the cannon and the cannonball between time = 0 and time = *t*?

	total kinetic energy of cannon and cannonball	total momentum of cannon and cannonball
A	changes	changes
B	changes	remains the same
C	remains the same	changes
D	remains the same	remains the same
