**3** A speed–time graph is used to describe the motion of an object.

Which quantities are calculated from the gradient of the graph and from the area under the graph?

| | gradient of the graph | area under the graph |
|---|---|---|
| **A** | acceleration | distance travelled |
| **B** | acceleration | total journey time |
| **C** | distance travelled | acceleration |
| **D** | total journey time | distance travelled |
