**24** A thin converging lens can produce both real and virtual images.

Which row describes a real and a virtual image?

| | real image | virtual image |
|---|---|---|
| **A** | rays converge to form the image | image can be projected onto a screen |
| **B** | rays converge to form the image | image cannot be projected onto a screen |
| **C** | rays diverge to form the image | image can be projected onto a screen |
| **D** | rays diverge to form the image | image cannot be projected onto a screen |
