17 Four metal blocks at a temperature of 200 °C are left to cool down to the same temperature.

The table gives the mass of each block and the energy it transfers to the surroundings as it cools.

block	mass / g	energy transferred / J
1	100	16 200
2	150	16 200
3	200	32 400
4	200	8 100

Which two blocks are made of the same metal?

A 1 and 2 **B** 1 and 3 **C** 1 and 4 **D** 3 and 4
