40 A scientist uses a counter to measure the radioactivity of a sample of nitrogen-13.

The counter and sample of nitrogen-13 are on a table in a laboratory.

The reading on the counter is recorded for a period of 80 min and a graph is drawn using the measurements.

What is the best estimate for the half-life of the sample of nitrogen-13?

A 10 min **B** 12 min **C** 14 min **D** 40 min
