18 The diagrams show two sets of wavefronts in a ripple tank.

A student makes two statements about the waves.

1 When the waves reflect from the barrier the direction changes but the wavelength remains the same.

2 When the waves refract as they enter the shallow water the direction remains the same, but the wavelength changes.

Which statements are correct?

A statement 1 and statement 2

B statement 1 only

C statement 2 only

D neither statement 1 nor statement 2
