**38** Polonium, Po, has a proton number equal to 84 and a nucleon number equal to 218.

Polonium changes into astatine, At, by emitting a $\beta$-particle.

Which equation represents this decay?

**A** $^{84}_{218}\text{Po} \rightarrow {}^{85}_{218}\text{At} + {}^{-1}_{0}\beta$

**B** $^{84}_{218}\text{Po} + {}^{-1}_{0}\beta \rightarrow {}^{85}_{218}\text{At}$

**C** $^{218}_{84}\text{Po} \rightarrow {}^{218}_{85}\text{At} + {}^{0}_{-1}\beta$

**D** $^{218}_{84}\text{Po} + {}^{0}_{-1}\beta \rightarrow {}^{218}_{85}\text{At}$
