9 A skier is pulled up a short straight slope at constant speed by a rope.

The tension in the rope is 100 N and there is a combined frictional and air resistance force of 20 N acting on the skier.

The slope is 10 m long and the skier rises 1.5 m vertically.

How much work is done by the rope pulling the skier up the slope?

A 120 J **B** 150 J **C** 1000 J **D** 1200 J
